W.A. #59: Resolution/Handicap Parking

The COD is proposing that the Town endorse a resolution to provide between 5%-10% of all parking in Business Districts to be Handicap Designated. Providing this number of spaces will be challenging and will require significant outreach to the business community. That said, the State is currently reviewing a proposal which would make it a law that 5% of all on street parking be HP assessable. Having this discussion now may better prepare the Town to comply with the 5% law if enacted.
