R. Strohsahl presented the project. This project proposes building an elevated addition in the backyard and an entranceway in the front yard. The back addition and front addition are both within the 100-ft Wetland Buffer, 100-ft Adjacent Upland Resource Area, and 200-ft Riverfront Area. No work is proposed within the floodplain. The project also proposes replacing an existing bituminous concrete walkway and driveway with pervious pavers.

S. Chapnick asked for clarification regarding the resource area delineations. P. Heidell asked how the floodplain resource area was delineated and whether a Letter of Map Amendment would be submitted to FEMA. R. Strohsahl stated that the wetland

resource areas were delineated by a wetland scientist and an engineer determined the floodplain boundary. A surveyor then combined the resource areas on the plot plan and also took elevations.

C. Tirone asked whether the driveway would be replaced at the same elevation as the current survey.

The meeting was abruptly ended due to Zoombombing at 8:45pm.
