Subject: Please fix Appleton/Mass Ave safety issue

In the before COVID-19 times, I commuted through this intersection four days a week for 25+ years. On the mornings when school was in session, it was relatively safe, because most drivers are either aware or hindered by traffic and pedestrians, but that's only relative to the extremely dangerous conditions at all other times. I encourage you to implement impediments to westbound, left-turning vehicles, and those who drift down from the Appleton St. stop sign.

Thank you
Jock Hoffman
