

Hello,

I am writing to express my opposition to the development of the Mugar wetlands. Based on everything I have read about the topic, approving the project will result in only limited, short-term gains to affordable housing in Arlington at the cost of wetlands that protect homes from flooding and are a habitat for wildlife. In addition, it will worsen the already terrible traffic on Lake Street during rush hour in non-Covid times. This tradeoff is not one worth making, and I strongly urge you to reject it.

Best regards,

Julia
