

Arlington Zoning Board of Appeals  
Arlington Town Hall.

December 21, 2020

May I have the following information on Thorndike Place/Mugar Wetlands. I was on the Arlington ZBA ZOOM calls on Nov. 24, 2020, and Dec. 3, 2020, learning the issues so I could know about them for the League of Women Voters of Arlington.

1. The latest rendered site plan with wetlands boundaries – this may be the October 22, 2020. The plans on the website are sparse. I want to see where the wetlands are precisely.
2. May I have the BSC Group Wildlife Habitat and Vegetation Evaluation Nov. 3, 2020.

Regarding this, when I visited the site via Dorothy Road and talked to neighbors. It looked to me like the site has being deliberately degraded with dumping, truck tracks and overgrown so developers could say it had no wildlife or vegetation value.

Tell me if it is impractical to send the documents to me, mail or e-mail ([nanhaydon@gmail.com](mailto:nanhaydon@gmail.com)). Tell me if there is a better way. Thanks.

Please include me when there is a walk-through. I would like to walk the site as an observer, along with other Arlington residents. When I asked at the first ZOOM meeting I attended, I was told by a representative of the owner of the site that 1. It would not be safe and 2. It is private property. I feel the land has been deliberately made not safe. Is there a better answer for Arlington residents who have a genuine interest in welfare of the town and care deeply about wetlands as I do?

Thank you.
