

I oppose the large scale of the design, because of increased traffic into & out of 2-lane residential Lake Street, the increased danger of accidents at the crossing of the Minuteman bike path, & because of even more overcrowding at Hardy School, which 3 of my grandchildren attend(ed). The school has already had to build an expensive expansion because of existing overcrowding. This has reduced the size of the playground, and meant that the younger children have to use the new playground on Lake Street, with its toxic traffic fumes.

Sincerely,

Mrs. Linda Agerbak
