

After consulting with Counsel, at the recommendation of the Superintendent, I will move this revised version of the amendments to File EBC Supplemental for first reading on September 23, 2021.

Voted that **File: EBC Supplemental. General (Interim) Policy on COVID-Related Issues** is amended by adding the following provisions:

- **File JJ - Co-Curricular and Extracurricular Activities. (File JJ)**

For the 2021-22 school year, the following is required for all students to participate in school-sponsored sports and rostered extracurricular activities that occur outside of the school day. Exceptions to this requirement can be found in File JLCB.

- 1. All students regardless of SARS-CoV-2 (COVID-19) vaccination status must consent for routine COVID-19 testing.**
- 2. All students regardless of SARS-CoV-2 (COVID-19) vaccination status must participate in weekly COVID-19 testing as conducted by the district.**
- 3. Students who are age-eligible to receive vaccination against SARS-CoV-2 (COVID-19), as indicated by the Commonwealth of Massachusetts, must be fully vaccinated prior to participation in school-sponsored sports and rostered extra-curricular activities that occur outside the school day, unless student qualifies for a medical disability or sincerely held religious belief exemption. The district considers a student fully vaccinated when it has been fourteen (14) days since the student was administered the final vaccination dose, required by the COVID-19 vaccine manufacturer, excluding booster shots. Students who are initially age-ineligible for the vaccine, but become eligible during the school year, must be vaccinated within six weeks of becoming eligible.**

- **IHBAA – Observations of Special Education Programs**

The Arlington School Committee has determined that, in order to protect the health and safety of students, vaccination against SARS-CoV-2 shall be required of all persons observing a special education student or program.

It is also voted that **File: EBC Supplemental. General (Interim) Policy on COVID-Related Issues** is amended by amending the following provision:

- **Visitors in schools and buildings (File KI)**

Subject to current emergency declarations, the superintendent may propose suspension or modification to district policies regarding visitors to school buildings during the school day and after school hours. Volunteers and visitors to district school buildings who seek entrance for the purposes of entering a classroom or other student space with multiple students outside of their immediate household, excluding hallways and designated drop-off/pick up areas, who decline to provide valid proof of vaccination against COVID-19 and do not qualify for limited exemption, shall not be permitted to enter classrooms or other student spaces with multiple students outside their immediate household.
