

Hi,

As an east Arlington resident within the Alewife area floodplain, I wanted to express my strong support for the general outline of the draft decision. It was no easy feat to ensure that current and future stormwater and flooding issues were addressed for current residents, while providing quality housing for future residents, many of them low-income, who will be similarly protected. I believe the draft decision does that, without precluding future opportunities to further mitigate climate change's impacts on east Arlington.

I have not read the entire draft decision. My main request, if it is not already handled, would be to ensure that all stormwater-related features be backed by mechanisms that will continue to be enforceable in the decades to come.

Thanks very much for your dedication,
Arthur Prokosch
