

APS Revised Protocol A: Test-to-Return

Return to school: On day 11 OR on days 6, 7, 8, 9, or 10, provided the Individual:

- Has tested negative on a rapid antigen test; and
- Has been without fever for 24 hours (and without taking fever-reducing medications); and,
- Has experienced improvement in other symptoms; and
- Can mask for 5 additional days when around others, except when eating. If a student cannot mask, follow DESE protocol/FAQ.

More Information about TtR:

- Only APS rapid antigen tests must be used for return testing after an infection;
- Students may only “test to return” one time between days 6 and 10;
- Students who test positive must continue to quarantine until Day 11;
- Students who test negative may attend school the following day

For the month of January, “Test to return” will take place at Arlington High School from 3:30-4:30pm Monday–Thursday.

Why Test-to-Return?

[CDC Quarantine and Isolation Guidelines](#): “If an individual has access to a test and wants to test, the best approach is to use an antigen test towards the end of the 5-day isolation period. Collect the test sample only if you are fever-free for 24 hours without the use of fever-reducing medication and your other symptoms have improved. ***If your test result is positive, you should continue to isolate until day 10. If your test result is negative, you can end isolation, but continue to wear a well-fitting mask around others at home and in public until day 10.***”
