To: Elizabeth Diggins <ediggins@arlington.k12.ma.us>, William Hayner <whayner@arlington.k12.ma.us>

Here is my formative assessment. Thanks:

Superintendent Homan has made impressive progress on her 2021-22 school year goals particularly considering all of the attention needed on the continuing COVID situation. Dr. Homan has quickly won the trust of her internal team, teachers and staff, and the greater community particularly with her forthright and clear communications. She has successfully implemented numerous key changes in internal procedures and standards and norms, such as the unified format for developing and presenting the School Improvement Plans and the revised budget process. I look forward to her continued progress.

I applaud Dr. Homan for taking time to be with her family when needed, taking time off or working from home. Hopefully some of the COVID-related concerns will begin easing, but I remain concerned about the potential burnout and encourage the Superintendent to continue to pace herself through the remainder of the school year.
