

## Mark Kaepplein Warrant Article Submissions

Article proposed Title/Subject Matter: **My Body, My Choice Resolution**

To see if the Town will vote to or take any action related thereto:

***Resolve that people have a natural and innate authority over their own body***

Article proposed Title/Subject Matter: **Medical Anti-discrimination Bylaw**

To see if the Town will vote to or take any action related thereto:

*create Title I, Article 24 of Arlington Town Bylaws stating "**People shall not be denied access to facilities or services based on medical status.**"*

Discussion:

It is said the first casualty of war is the truth. Principles are a close second. Hence the need to remind people of principals recently forgotten.

These are statements by Arlington affirming the rights adults have over their body in the face of recent challenges. That we believe in reproductive rights, gender affirming rights, and the right to make our own medical decisions, including surgeries, which drugs to take or not, and wearing a medical facemask or not. The principle applies to all, and one has principles or not. In the second warrant article, we affirm that people have rights of equal access, not just based on color, creed, sexual orientation etc., but also whether we carry HIV or a vaccination card, and wear a medical mask or not.

When government makes edicts on the bodies of people, they should at least be made by elected officials and thus responsible directly to the people. In Arlington, they are not. The board of Health is appointed as is the Superintendent of Schools. The first has expertise in restaurant food safety and vermin control while the second in educational administriva. They follow political health policies from more appointed government workers.

In times of new diseases, fear and ignorance rule. We should have learned from the AIDS crisis when people feared they could catch AIDS from public toilet seats and drinking fountains- human rights fell by the wayside. Gay men were thought to all be potential carriers and were discriminated against. This produced new laws protecting private medical information. All forgotten by those demanding to see people's proof of vaccination cards and demanding wearing of medical face masks.

Discarding principles from consideration, what does science say about Covid-19 prevention measures?

First consider the science in 1600 when Earth was considered the center of the universe. Common sense supported that, as when we looked up at the sky, all the planets, stars, and the sun were around us. Common sense was also the basis of one-way store aisles, people wearing medical masks to filter the air, and Covid-19 vaccines to keep us from catching Covid-19 and then transmitting it. That is what "vaccines" do, right?

The current science is that the earth is not the center of the universe, or even our solar system, "Wearing masks in the community probably makes little or no difference to the outcome of influenza-like illness (ILI)/COVID-19 like illness compared to not wearing masks"

[<https://www.cochranelibrary.com/cdsr/doi/10.1002/14651858.CD006207.pub6/full>], and Covid-19 vaccines do not provide immunity. Worse, data from the Cleveland Clinic show natural immunity superior to Covid-19 vaccination and more boosters increase the likelihood of contracting Covid-19!

Another study: in December in the New England Journal of Medicine found the latest booster ineffective against the dominant Omicron strain going around - XBB and subvariants. <https://www.nejm.org/doi/full/10.1056/NEJMc2214293>

FDA Post-Authorization adverse events report for Pfizer Covid-19 vaccine: <https://phmpt.org/wp-content/uploads/2021/11/5.3.6-postmarketing-experience.pdf>

mRNA based Covid-19 vaccines have had more adverse effects than all other vaccines combined. The swine flu vaccine of 1976 was withdrawn after 1 in 100,000 cases of Guillian-Barre syndrome were confirmed. <https://www.cnn.com/2020/09/01/health/eua-coronavirus-vaccine-history/index.html> Covid-19 harm has been far greater with G-B syndrome and other neurological illnesses, strokes, and heart attacks. Their personal stories, censored by the mainstream media, are heart wrenching. <https://www.cnn.com/2020/09/01/health/eua-coronavirus-vaccine-history/index.html>

"Excess deaths" are up around the world, in numbers greater than COVID deaths, but less so in countries least vaccinated like Bulgaria. Countries like Norway and England are starting to discourage people under 60 from getting even the latest booster shot as there is more likely harm than good for them. In Massachusetts, the average age of people who died from Covid-19 is 78 years old, while the average lifespan is 80 years old. The young are at far greater risk from side effects than Covid and should not be

getting these vaccines. <https://www.euopereloaded.com/europe-has-suffered-a-record-breaking-number-of-excess-deaths-in-2022/>

I hope you will support these warrant articles defending personal rights and freedoms.
