**Subject:** MBTA Communities Proposal

Dear ARB Members:

I am writing to express my strong opposition to any recommendation beyond the minimum 2046-unit increase required by state law.

The overcompliance that is being proposed by the working group does not represent the voice of the people of Arlington and I sincerely believe that their proposal and assumptions are deleterious to our town in so many ways.

Meeting the minimum requirements should be what we prioritize now and if warranted, this decision can be revisited in the future, with broad involvement of then community and voted on in a town election.

This major redesign of the zoning of our town that is being pushed by a small elite group does not reflect the will of the people.

I appreciate your time and consideration.

Respectfully,  
Michelle Keenan
