Dear members of the Select Board,

I am writing to support the Appleton Street corridor bike lane improvements (Dutch style). That intersection is very scary as a cyclist as I experienced recently when biking my preschooler through there on our way to Arlington Heights Nursery School. I ended up just dismounting and walking on the sidewalk for that part. The lack of a shared lane and needing to take a left turn while riding westbound was just to harrowing. Thank you for your attention to this matter.

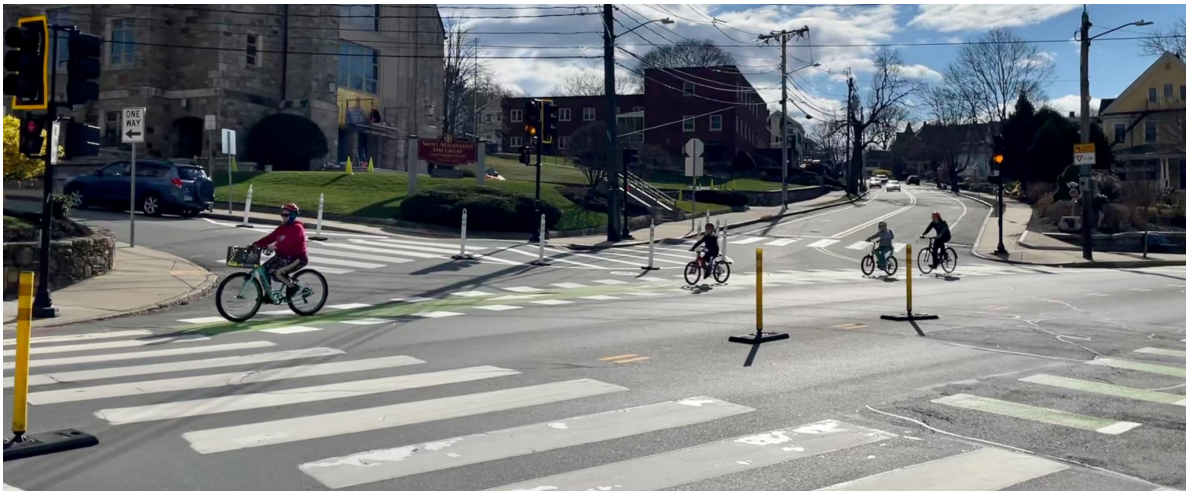

Sincerely,

Christopher Mow
130 N Union St
Arlington

Dear Arlington Selectboard,

I am writing to extend my **strong support** for the proposal being brought to you to reconstruct the Massachusetts Avenue corridor in the vicinity of Appleton Street, with the inclusion of **grade-separated bicycle facilities**.

A family uses the quick-build bicycle facility on Massachusetts Avenue. While an improvement, this bicycle facility remains unprotected and ends abruptly just a block away, forcing cyclists back into mixed traffic.

While strides have been made to improve the intersection, and they have improved safety, **it is clear that more needs to be done to develop this corridor into a modern, green, and safe street.** And those changes will require trade-offs, that's undeniable. However, it's crucial to reflect on what is paramount: safety. Even if that means we have to park a little further away from our destination, if it saves lives and improves the comfort of bicyclists, we should be okay with that trade-off.

I live very close to this intersection and find traveling through it uniquely harrowing in every different mode. The traffic signal control is confusing to drivers, the poor pavement quality and spontaneous bicycle lanes are dangerous for people on bikes, and the speed of motor vehicles is dangerous for pedestrians. The town deserves a new corridor, with space for bicyclists, dedicated and clear traffic signals, and traffic calming to make it easier to cross the street.

The quick-build bicycle facility includes a block of shared lane markings, forcing bicyclists into the middle of the street alongside dangerous vehicles. The new proposal to reconstruct this corridor would eliminate these shared lane blocks, by providing continuous, dedicated, and protected facilities for people on bikes.

As we move into a world where the effects of climate change are ever more obvious, it should be clear that we need to prioritize multimodal transportation. A plan that **does not** include these continuously separated bicycle lanes would be unsafe, and quickly regrettable. A [2023 study from the FHWA](#) found that converting a buffered bike lane, like the one that exists currently on Massachusetts Avenue, to a sidewalk-level separated bike lane resulted in a crash modification factor of 0.57, a significant reduction. Especially when considering the volume of middle school traffic that exists along this corridor, the proposed enhanced protection aligning with the Connect Arlington Transportation Plan guidelines is a must. This, in addition to new left turn travel lanes, traffic calming, and protected left turn signal phasing will provide much-needed clarity and relief for vehicle operations. This project is a win-win for all.

I wholeheartedly urge the Arlington Select Board to **endorse this proposal**, ensuring the safety and well-being of all street users and contributing to a better, safer future for Arlington.

Thank you for your thoughtful consideration of this matter,

Petru Sofio

Good morning,

I am writing to urge you to support the proposed safety improvements for the Mass Ave / Appleton intersection and surrounding blocks that will be on the Select Board agenda this coming Wednesday 9/27.

This area is well used by bicyclists and people on foot, including children going to and from Ottoson Middle School. The proposed improvements are important to maintain the vitality of this area. Safer streets make a place more appealing and will attract customers to local businesses. They will also ensure the safety of residents, including the future occupants of the 124 new apartments at The Artemis at Arlington Heights.

Please vote to support the proposed design, which has been greatly improved to preserve more on-street parking without compromising the safety of road users.

Best regards,

Vincent Baudoin

Dear members of the Select Board,

I write to you to support the proposed updates to Massachusetts Ave that will enhance bicycle safety. Most days I stay on the Minuteman trail, but I use that stretch of Mass Ave to visit nearby businesses and in the summer when the Minuteman is busy (and it is a good thing when it is busy). I also think about my children, both of whom went to Ottoson, always taking the bus, and therefore crossing Mass Ave twice a day.

Although I live in East Arlington, I think attention to infrastructure for bicycles anywhere in the town improves safety for cyclists anywhere in town. I am also excited by the discussion of the intersection at Broadway and Warren, where the behavior of some car drivers has been disappointing. Attention to bicycles anywhere in town highlights the need for bicycle safety everywhere in town.

Dear members of the Select Board:

At our monthly meeting on 9/20, members of the Arlington Bicycle Advisory Committee (ABAC) reviewed the revised Mass / Appleton plan and voted unanimously to recommend that the Select Board approve it.

Given the proximity of Ottoson School and the high number of crashes at this location (including a fatal collision with a cyclist in 2020), it is essential to create a street environment that works for all users: walkers, transit users, cyclists, and motorists. To quote one of our committee members, the latest plan is “a great example of an effective compromise” that restores parking, while continuing to provide effective bicycle-motorist separation.

As the plan moves to final design, it is essential for safety to design the on-street parking so that adequate visibility among users is maintained. Motorists turning right or left into driveways need to be able to see cyclists on the cycle track (and vice versa). Similarly, motorists exiting from driveways need a clear view of everyone on Mass Ave: pedestrians, cyclists, and other motorists.

We urge your support of the revised plan.

- Scott Smith (acting chair during Christopher Tonkin’s absence)
Arlington Bicycle Advisory Committee

Dear Select Board members,

I write to declare my strong support for the Mass Ave / Appleton Safety and Accessibility Project final configuration. I am an East Arlington resident. Our household frequently drives up Mass Ave to the Heights for various shopping and entertainment. We have stopped driving that route any sunny late afternoon as even with the temporary improvements it is too difficult to see bikes and pedestrians with the glare.

Reading all of the Project's history it appears to me that compromises in regard to increasing the number of parking spaces have already been included. While I am unlikely to bike that route I will very much appreciate the project keeping us from unintentionally causing harm to other people in transit.

I'm aware that some North Cambridge businesses complained about parking loss and slowed traffic when Mass Ave was reduced to one driving and one bus lane & a bike lane. I have had no difficulty continuing to shop there, and regularly commute home that way without feeling the traffic is too slow. I am confident Arlington can implement this project with reasonable results for all.

Thank you,
Betty Widerski

To: Len Diggins <ldiggins@town.arlington.ma.us>; Stephen DeCoursey <sdeCoursey@town.arlington.ma.us>; John Hurd <jhurd@town.arlington.ma.us>; Diane Mahon <dmahon@town.arlington.ma.us>; Eric Helmuth <ehelmuth@town.arlington.ma.us>; Ashley Maher <amaher@town.arlington.ma.us>; Jim Feeney <jfeeney@town.arlington.ma.us>; John Alessi <jalessi@town.arlington.ma.us>

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To the Select Board,

I am writing as a parent of an Ottoson 8th grader, and someone that regularly walks, drives, shops, and bikes in, around, and through the Mass. Ave. & Appleton intersection.

I urge you to support the proposed reconstruction of this intersection with shorter crosswalks, better bus stops, and separated bike lanes. These are well-tested and proven methods to reduce risks to pedestrians, the majority of which are school children in the morning and afternoon. These changes also reduce the mixing of cars and bikes, making things simpler for all parties, including pedestrians.

In addition, I helped perform counts for the parking study in this area, and am entirely unconvinced by any arguments against these changes based on preserving parking. The data clearly show parking is overabundant and underused in this area. These changes will therefore not lead to a shortage of parking in this area.

Please support these changes in order to improve the safety of Arlington residents.

Thank you,
Thouis Jones

Dear Select Board,

I am writing in support of the proposal to fully reconstruct the Mass Ave corridor surrounding Mass/Appleton and install protected bike lanes. Like Cambridge, Arlington should aspire to be a leader in these types of safe, green initiatives.

No one should die because Arlington will not vote to improve bike lane infrastructure. Please support initiatives like these that improve transportation and safety for all residents, not just cars.

Thank you,
Paige Clunie

Re: **Petition Signatures in Support of the Mass Ave Vision Zero campaign in Arlington**

To the esteemed members of the Arlington Select Board:

On behalf of the EALS Coalition, I am writing this letter for inclusion into the formal record of the April 4, 2022 Select Board Meeting. The Coalition requests the Select Board to address the issues and concerns raised below related to pedestrian and bicycle safety along Mass Ave. These issues have been framed within our Mass Ave Vision Zero campaign and petition, signed by 544 individuals, including 466 Arlington residents (see enclosure for names).

The goal of Mass Ave Vision Zero is the elimination of fatalities for all users of Arlington's *de facto* Main Street. As you know, in less than ten years, two pedestrians and a bicyclist have been killed by automobiles on Mass Ave. For a Town that prides itself on its sense of community and high quality of life, these three fatalities should be considered unacceptable. Besides containing our three primary business districts, Mass Ave sees thousands of children walking, biking, riding the bus, and being driven to school on a daily basis. It's for these reasons that the recently-adopted *Connect Arlington Plan* highlighted the need to improve safety for pedestrians and bicyclists on Mass Ave. Our group, the 466 Arlington residents who signed the petition, and likely hundreds of others whom we were not able to reach, hope the Town will move quickly to ameliorate the hazardous conditions along the avenue.

We implore the Select Board to make Mass Ave **a safer, more-accessible, more-comfortable street** for all residents and visitors no matter their transportation mode, age, or physical ability. We know that fixing a roadway that runs for more than three miles through Arlington cannot be done overnight. We hope the Town will consider a phased approach to enhance safety and accessibility on Mass Ave in the short, medium, and long term. Our preliminary recommendations include:

Short-term Improvements (<2 years, by the end of 2023)

- Enhanced crosswalks at non-signalized intersections or mid-block
 - Priority 1: Rectangular Rapid Flashing Beacons (RRFBs¹) at 3-4 lane segments of Mass Ave (12 locations)
 - Priority 2: RRFBs at 2 lane segments of Mass Ave (12 locations)

¹ RRFB cost estimate: \$20,000-\$30,000 per crosswalk; can reduce pedestrian-involved crashes by 47%, per FHWA Proven Safety Countermeasures: <https://safety.fhwa.dot.gov/provencountermeasures/rrfb.cfm>

- Elimination of bicycle lane gaps²
 - Dundee Rd. to Sunrise of Arlington (650')
 - Burton St. to Brattle St. (1600')
 - Coleman Rd. to Schouler Ct. (900')
 - Schouler Ct to CVS crosswalk, upgrade to separated bike lanes to protect riders from busy AHS drop-off zone (650')
 - Sunapee Rd. to Rt. 16 (250')
- Installation of 20-50 new bicycle racks³
- Study to determine opportunities to improve bus service via transit signal priority, queue jumps, and enhanced bus stops with shelters and benches (cost TBD)

Medium-term Improvements (2-5 years)

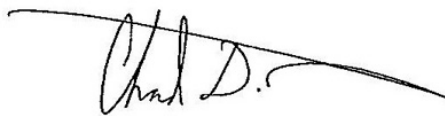

- Lane re-allocation to improve safety for motorists, pedestrians and bicyclists (two travel lanes, median left turn lane, bike lanes, and refuge islands at all crosswalks)
 - Priority 1: from Bartlett Ave. to Rt. 60 (cost TBD)
 - Priority 2: Franklin St. to Harlow St. (cost TBD)
- Rebuild of Mass Ave/Appleton intersection w/ new signal equipment (cost TBD)
- Elimination of bicycle lane gaps
 - Lexington Town Line to Dundee Rd. (900')
 - Bartlett Ave. to Rt. 60 (1800')
 - Appleton St. to Burton St. (275')
- Implementation of improved bus service via transit signal priority, queue jumps, and enhanced bus stops (shelters, benches, and amenities)

Long-term Improvements (5-10 years)

- (Worst-case) Rebuild of Mass Ave/Appleton intersection w/ new signal equipment (cost TBD)
- Mass Ave rebuild and streetscape enhancements from Rt. 60 to Franklin St. (cost TBD)
- Elimination of bicycle lane gap: Swan Place to Pond Lane (1200')

We recognize the need to overcome a variety of challenges to implement this phased Vision for Mass Ave. While funding is always a primary concern, all of the short-term and most of the medium-term improvements are intended to be relatively low cost, likely totaling less than \$1 million. Also, closing the bicycle lane gaps will require restricting parking to one side of Mass Ave but fortunately, the impact will be blunted since none of the gaps feature storefront businesses on both sides.

We look forward to hearing about the next steps in the process. Thank you,

Phil Goff and Chad Gibson, Co-chairs

Everywhere Arlington Livable Streets (EALS) Coalition

ealscoalition@gmail.com

² Striped bike lanes (both directions): \$30-40 per linear foot

³ Bike racks, not including installation: \$150-300 each, or per MAPC program

Mass Ave Vision Zero Petition 2022

MASS AVE VISION ZERO Ensuring pedestrian and bike safety from Arlington Heights to Cambridge

While Massachusetts Avenue provides a link for drivers, bus riders, pedestrians, and bicyclists, the road has proven deadly for the latter two modes and MUST be fixed. The goal of the Mass Ave Vision Zero campaign is to move elected and appointed officials to ensure that every block of Mass Ave is safe for all users.

Whereas:

- Two pedestrians and one bicyclist died on Mass Ave after being struck by automobiles (in 2013, 2015 and 2020, respectively) with others seriously injured,
- More than 3,000 children use Mass Ave to access Arlington High, Ottoson Middle, Arlington Catholic, and the Gibbs School on foot, by bike, by bus, and by car,
- All three of Arlington's primary business districts rely on Mass Ave to provide access for customers and employees,
- The recently approved Connect Arlington Plan explicitly identifies the need to improve pedestrian/bike safety along the length of Mass Ave, and;
- Mass Ave provides active transportation connections to the Minuteman Path, the Alewife Greenway, and protected bike lanes in North Cambridge.

Therefore, the Town of Arlington must make Mass Ave a safer, more-accessible, more-comfortable street for all residents and visitors no matter their transportation mode, age, or physical ability. Mixing 'quick build' improvements with a vision for longer-term redesign of key segments, the Town should follow these four principles:

1. Designated crosswalks shall be made safe using more pedestrian-friendly traffic signals and median islands, bump outs, improved lighting, and flashing beacons at unsignalized intersections
2. Striped bike lanes—ideally separated/protected from traffic—shall be incorporated with green pavement markings through busy intersections and plentiful bike racks from end-to-end
3. Bus service should be faster and more reliable with priority bus lanes and queue jumps, more bus shelters and—after coordination with the MBTA—enhanced service
4. On-street parking must prioritize short-term customer parking (not employees or residents) without compromising safety for people walking, bicycling, or using mobility devices.

We, the undersigned, support the principles above and call for the Town of Arlington to fulfill the Connect Arlington Plan and expedite planning and fundraising to ensure implementation of the lower-cost, 'quick build' safety features on Mass Ave prior to June 30, 2023.

September 25, 2023

To the Members of the Arlington Select Board,

I am writing on behalf of the Massachusetts Bicycle Coalition in **support** of the revised concept design for the Mass Ave / Appleton Safety and Accessibility Project, as presented on the Arlington Town website on September 19, 2023. I urge the Select Board to **vote in favor** of this design so that the Town can move forward with a funding request as soon as possible in order to realize a safer Mass Ave for all road users.

Our concerns for this particular project stem from the crashes that took the life of Charlie Proctor and that nearly killed Leonard Greenberg in two separate incidents in May 2020. This corridor and this specific intersection were identified as far back as 2012 as being dangerous for vulnerable road users, especially bicyclists. Given the sensitive nature of the area, including nearby nursery and middle schools, a popular church, a business district, and an arterial that cuts through a residential area, we encourage the Town to continue to act swiftly to ensure future tragedies are prevented and public safety is of paramount concern.

Over the past three years, MassBike has been contributing to the conversation and is grateful that the Town has been working with members of the design review committee; made up of residents, abutters and adjacent businesses, and road users of all kinds working together to find a design that prioritizes safety and accessibility. The conversations have been thorough and have expanded to include the nearby intersections along the corridor, realizing that in order to treat the immediate concern of Appleton Street, the Town needs to address similar safety concerns of surrounding intersections. We feel that this revised concept design takes a broader look at the needs of the area and will create a culture of safety for all modes traveling throughout this busy stretch.

The current revised proposal clearly meets the objective to create a safer and more accessible Mass Ave by providing sidewalk-level bicycle lanes, narrowed travel lanes that will decrease vehicle speeds, added separation between bicyclists and drivers, bump-outs for pedestrians and clearly marked crossings, and will improve safety for all users. The proposal also preserves the most utilized parking spaces, as identified in the Town's parking study, and makes the corridor into a downtown-like environment to encourage trips to businesses by creating a safer place to visit.

Finally, I want to express gratitude for the quick actions that the Town has taken to date to improve conditions at the Appleton St intersection. The 2021 Near-Term improvements have been significant and the dangerous left turn onto Appleton has mostly been eliminated. While these modifications have improved safety, more needs to be done to extend safe conditions throughout this corridor to create an accessible Mass Ave for all road users. I ask that the Select Board **vote in favor** of this revised design and I look forward to continuing our support of the Town in its pursuit of a MassWorks grant to get this project funded and in the ground.

Thank you for your consideration of this request. Sincerely,

Galen Mook
Executive Director
Massachusetts Bicycle Coalition

Please support the updated Mass Ave / Appleton Intersection redesign

Dear Honorable Select Board Members,

I am writing to ask you to support the updated Mass Ave / Appleton Intersection redesign. I hope you concur with me that this updated redesign optimally balances biker and pedestrian safety with the local businesses' needs for customer parking.

A positive vote from the Select Board is not only important to ensure the safety of our community, but also to validate efforts like the MBTA Communities zoning overlay plan, which includes the area of this intersection. The MBTA Communities zoning overlay plan reflects the community's desire to have housing in locations in which it is possible to use alternative modes of transportation to travel around and through our Town. We need to make sure that Arlington prioritizes the safety of modes of transportation other than cars.

I ask the Select Board to vote in favor of the Mass Ave / Appleton Intersection redesign, and show our community that we're supporting our walkers and bikers and their safe access to our streets and roads.

Please include this email with correspondence received.

Thank you for your consideration,

Rebecca Gruber
