I would like to request an On Street Day Time Parking Permit (permanent) for one vehicle at 12 Brooks Ave. APT 1.

The request is for the permit outlined in II(c) (page 9) of Parking Policies and Regulations (<https://www.arlingtonma.gov/home/showpublisheddocument/35197/637390472390800000> , attached).

Based on the wording in the Parking Policies and Regulations, I'm not sure if this will be up for discussion at the Select Board, or if it automatically moves forward into inspections and payment. For good measure, I'll include some comments on why we're submitting this request.

My fiancée and I participate in tandem parking with our upstairs neighbor/landlord; for overnight parking we can sort things out easily enough, but during the day we have to plan around the 2hr parking limits 9-5 M-F on our street. To avoid street parking for more than 2hrs, we have to constantly communicate with our landlord and sometimes have to shuffle cars multiple times a day. As we work from home, we have to balance our jobs' meeting schedule with having an opportunity to move our car off the street. When urgent matters arise at work that cause us to stay parked 5 minutes over the limit- we get a ticket. A daytime parking permit would remove a lot of the constraints we have around parking, and make our lives a lot less stressful.
